TINY SEEDS • POWERFUL HEALING

SEED ACUPRESSURE THERAPY

Discover an ancient, natural way to heal faster — no needles, no chemicals, just the power of nature working with your body.

Why It Works

Every seed carries life. The same energy that turns a tiny seed into a towering tree is channeled into *your* body — awakening its own power to heal, restore, and recover. Placed precisely on acupressure points, seeds like green gram, kidney beans, fenugreek, and peas become gentle healers — boosting the results of your other treatments and speeding up recovery.

Precision Healing, Seed by Seed

Round Seeds

Peas & black pepper
Soothe eyes, head, knees & back

Kidney-Shaped Beans

Red beans
Support kidney & stomach health

Sharp-Edged Seeds

Applied mechanically
Deliver focused, targeted relief

How It's Applied

1. **Choose the Right Seed**
   The shape, size, and colour of the seed are matched to the ailment being treated.
2. **Place & Secure**
   The seed is positioned precisely on the acupressure point and held in place with an adhesive plaster.
3. **Press & Let It Work**
   Gentle, regular pressure on the seed stimulates the point — supporting your body's own healing process.

See the Healing Happen

Watch closely — after treatment, the seeds themselves transform: they may shrink, crack, change color, or crumble. It's nature's proof that the seed has done its work, drawing pain and illness away from your body.

Safe. Natural. Effective.

A gentle therapy rooted in centuries of wisdom — complementing your treatment, naturally.

Note: Seeds are single-use and discarded after each session for your safety.
